Promising Futures.

# SECURE ONE

## SECURED STORAGE VAULT SYSTEM

### FABRICATION

Our *Secure One* vaults, parts, and panels are fabricated from 20-gauge steel but feature a 10-gauge steel back panel and all bottoms are reinforced to include a front glide support. The patented Interlock System used on the drawers permits only one drawer to be open at a time, thus eliminating the risk of the vault from tipping. Our *Secure One* vault drawers glide smoothly on the Repon 200 lb. heavy-duty slide-arm suspensions with steel ball bearings. These suspensions are flawlessly designed for years of rugged use. The locking paddle handles are constructed of premium 304 heavy duty stainless steel, providing the ultimate rust and weather protection. The vault interior is lined with a non-woven, durable, stain resistant, high-quality polyester fiber that provides protection of your precious cargo and dampens sound as well.

### FINISH

All surfaces are professionally finished with an electrostatically applied, heat sealed epoxy powder coat that gives our vaults long lasting protection from all the use and abuse you can throw at them. VCE has specifically chosen the finest quality hybrid epoxy product by Sherwin Williams. Our finishing plant's workforce are vendor certified to apply this product through the Sherwin Williams Protective Coating Applicator Program. Powder coating offers unparalleled durability to our *Secure One* vaults that will retain their look and professional finish for many years of rugged service.

### OPTIONAL FEATURES

- ⦿ \*2 Color Choices:
  - Textured Black (# PG0980)
  - UV Green (# PGRAL6005)
- ⦿ Two sizes to fit your needs and budget:
  - Large: 42"W x 24"H x 18"D, 2-drawer
  - Small: 30"W x 17-13/16"H x 18"D, 1-drawer
- ⦿ Interior LED Lighting:
  - Color: White/Red/Green
  - Delayed/Adjusted 1-10 minute delay
  - Motion controlled
  - IP67 water proof
