“Creating Quality Products
and Promising Futures”

Your Linen Service

Why should you outsource?

Bulk washing is the most cost efficient means of washing, usually for pennies per pound. Overall your spending is far less than owning, servicing and eventually replacing your own equipment.

Large commercial wash loads are far more energy efficient, better for our environment.

Commercial washing is fast, turnarounds in as little as a couple of days.

Special packing and packaging to par level specifications. Rag out & stain sort.

OSHA compliant in infection control procedures. Sanitation methods safely remove pathogens, restoring linen to hygienic service.

Job Skills=Opportunity

Supervised offenders operate all of our plants, learning valuable job skills in a real-world work environment. Developing and maintaining a work ethic, while incarcerated, is critical for offenders to succeed upon release.

Virginia's recidivism rate is currently the lowest in the nation and our work programs help to make that fact-a-reality.
